Lankershim, Cal.

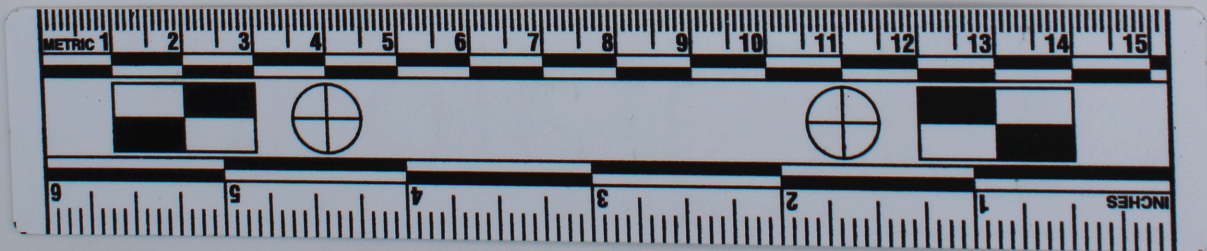

Apr. 22 - 1912

My dear Edie:-

"The top o' the mornin' to ye."

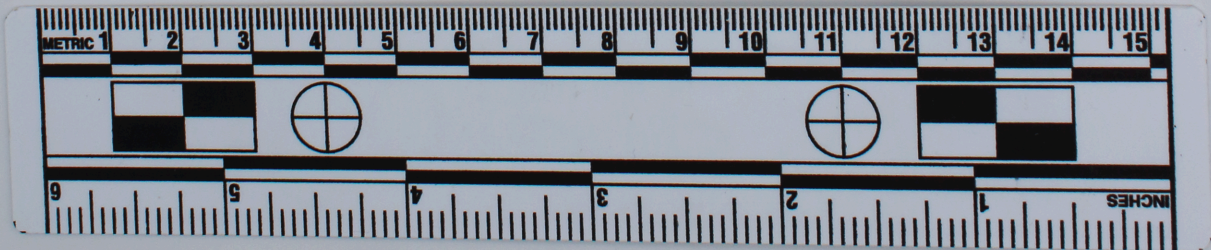

Breakfast over, dishes picked up & several little things done and Paul has just come to start washing - so I'll sit down and "take my pen in hand."

I suppose you have been sleeping with your telephone ear open every night - seems a long time at this end of the line but the ripe fruit always falls and in good time our little stranger will come

I have been so very miserable part of the time but feel fine as silk this morning. So that's good tidings! Mr S. took a long quiet drive yesterday p.m. would do me good. We went out at 4 p.m. after it began to get cool & drove till nearly dark - slowly - and how I enjoyed it! Came home & had a lunch then went to bed & slept for hrs. without waking. I needed the sleep, too.

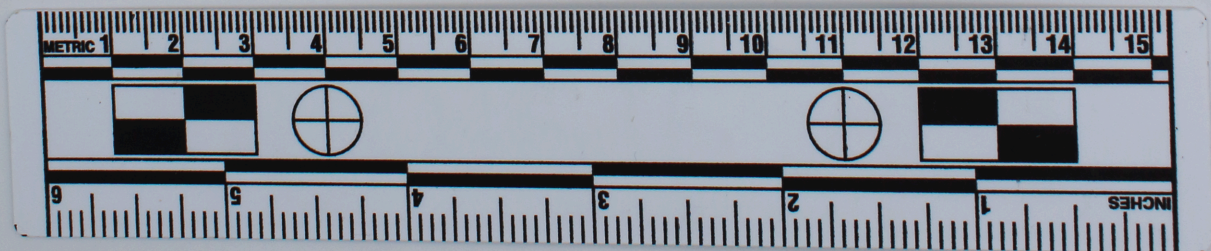

Mrs. Falony is still "visiting" with us and takes entire care of Margaret now - even puts her to sleep at night. They both stay out doors most of every day which is fine for both of them. Bob looks so cunning in her overalls. If Mr S. has the cash to-day at noon will enclose pay for them and a few little things if you want to get them and bring out when you come. He was going to send insurance dues to-day and sorry no. There is something to take every cent & then some. Isn't it "awful"? Had a letter from home said

day. Father said if he had his property converted
into cash they would like to spend the balance
of this days in So. Cal. and would like to come
west winter & stay about six months, anyway.
I think they will - they are not well & it would
do them lots of good.

How fine every thing looks this morning! I want
to go down & look at apricots when I finish this. We
hope to have a big crop. Had some frost last night
but not enough. I guess to do any harm. (Must take
my pudding out of the oven. Rice & raisins; swell it!)

^{Tuesday}
Last week, ^{Tuesday} Ida wrote that Riley had been sick
in bed for 2 weeks & sick two wks before going to bed.
We had not heard in about six weeks so Mr R.
went in that same evening & came home on 11-15
car. Said he never saw his bro. look so bad. Heard
last week (Friday I think) that he was improving
but will be some time before they can go to new
house. The folks came from Texas and are occupy-
ing part of Riley's house so they are anxious to
get away as soon as they can. They may not come

out before they go.

Mrs. Trickett is very sick and doctor says she cannot get well - she is mother of our parlor's wife. She called there while out riding, to inquire. Was a little better yesterday - Hope you & Saddy are not working too hard. so much to be done on a ranch this time of year. Mr. Shuman stayed at home fr. & sat. to work & I tell you a little work makes things look better here. Our dooryard back & front looks pretty good just now - clean etc. & roses blooming nicely - We stop now & finish later - "Ga" -

1-p.m. Mr. J. is hitching up - He had "change" enough for the "odis allo" but I want to send more & he said he'd have more in a few days. Will let you hear as soon as any thing occurs -
